**Thank
* You!**

A short reflection paragraph (4–6 sentences) answering:

1. What design principle did you find most useful?

- The design principle I found most useful was simplicity, because it made my slides look cleaner and easier to follow.

2. What part of Canva was easiest/hardest to use?

- The easiest part of Canva was choosing templates and editing the text, while the hardest part was arranging the elements so the slides didn't feel too crowded.

3. What did you learn about visual communication?

- I learned that visual communication is not just about making things look nice, but about helping the audience understand the message more clearly.
